

Backup Manager

Here When You Need It

More than ever, we are relying on computers, tablets, phones and servers to store and secure data. Malicious attacks, viruses and email spam are a daily threat in any technology environment. Having a method to backup and restore data is critical. Back-up Manager from Systems Plus can protect all of your digital real estate from the vulnerabilities that are prevalent in today's digital world.

Protecting Your Data

Backup Manager will provide you with a fast reliable image based data back-up and the ability to restore to different computers or servers.

Backup manager provides:

- Protection of critical business data
- Desktop, laptop and server protection
- Block – level, infinite, incremental backup
- Granular file recovery
- Restore to different hardware
- Ability to safeguard data by encrypting your back-ups

Backup Manager from Systems Plus

Backup Manager from Systems Plus delivers proven technology that performs comprehensive backup services at frequent, regular intervals. Providing you with peace of mind knowing that your data is protected and managed by our engineering staff.

“We’ve got your back!”

Other Tools and Services available:

Off-site Backup

A cloud-based backup that allows you to access your files from anyplace with an internet connection. Off-site backup is a safety net for your data in the event on-site backup is unavailable.

Endpoint Defender

Protect end-points from debilitating viruses without impacting performance. With no renewal dates to miss, protection never stops.

IT Commander

From a single pane of glass, IT Commander enables one IT person to manage and monitor computers, servers, and mobile devices.

Full Service IT from Systems Plus

Full service IT monitors all of your technology systems 24/7 and provides alerts to prevent IT failures. You can focus on running your business knowing your technology is being monitored, updated and protected.

Full Service IT includes:

- **Proactive Technology Management** – patch, anti-spyware, and spam management, desktop optimization, off-site backup
- **Network Administration** – end-point management, network maintenance, patch management, analyze and isolate issues
- **End-user Support** – desktop support, installation of software, hardware, patch management, antivirus management
- **IT Strategy Consulting** – technology overview and summary that guides IT planning and budgeting
