

THESE ARE FRUSTRATING.

Regular updates and maintenance are necessary to keep your Mac consistently working, but they're also tedious and time-consuming.

PLUS CARE FROM SYSTEMS PLUS

PLUS CARE runs behind the scenes to safeguard your computer without interrupting your work. Our automated, proactive service ensures your Mac is healthy and secure by monitoring your hardware, performing routine maintenance, and updating software programs, including Adobe Flash, Java, and Firefox. **PLUS CARE** also monitors your operating system and provides security updates on your Mac.

PLUS CARE SERVICES INCLUDE:

- **Apple operating system and security updates**
- **Common software updates** (*Flash, Office, Java, Firefox etc.*)
- **Removal of harmful viruses and malware on OS 10.5 and up and full disk scans** (*when possible*)
- **Health checks to ensure consistent, long-term performance:**
 - ✓ *Laptop battery for consistency/longevity*
 - ✓ *Hard drive health and apply permission repairs*
 - ✓ *Memory testing and report errors*
 - ✓ *Directory structure testing and repair*
 - ✓ *External hard drive health*
- **System and user cache backup and purge**
- **Reports that initiate proactive notification:**
 - ✓ *Client status*
 - ✓ *Disk errors (I/O)*
 - ✓ *# of kernel panics (bad OS X crashes)*
 - ✓ *POST (hardware) errors*
 - ✓ *RAM (hardware) errors*
 - ✓ *SMART (disk) errors*
 - ✓ *Time Machine backups*

HOW DOES PLUS CARE WORK?

PLUS CARE runs many processes in the background while you are working without slowing down your computer. Other processes run when you are logged off.

CONTACT OUR SALES NOW FOR SPECIAL INTRODUCTORY PRICING
